

EPOXY - AIS / GIS

AIS - AIR Insulated Switchgear Products

Shubhada specializes in manufacturing a diverse range of AIS (Air Insulated Switchgear) support insulators, vacuum bottle housings, and panel bushings suitable for applications up to 36 kV and 50 kA STC. We prioritize customer collaboration, engaging with clients during the initial development stages to provide valuable inputs during feasibility studies, optimizing designs, and ensuring correct material selection.

Our product line adheres to the highest industry standards, designed in accordance with IEC/ANSI specifications to guarantee performance and compatibility.

GIS - GAS Insulated Switchgear Products

Shubhada specializes in manufacturing a diverse array of insulators, Ring Main Unit (RMU) bushings, supports, and vacuum bottle housings tailored for both primary and secondary Gas Insulated Switchgear (GIS) equipment, covering applications up to 36 kV.

Our product range includes bushings designed in accordance with IEC/ANSI standards, ensuring compatibility and compliance with international specifications.
